+ JOB EXPERIENCE

DENNIS PUBLISHING

Drupal Developer
Aug 2021 - Oct 2021

A short contract to help maintain the Drupal backend of all of the Dennis Publishing group websites.

Modules were shared over multiple sites from a private packagist repo.

Lots of Behat, Functional and Unit tests and config management.

VERSANTUS

Drupal Developer
Feb 2021 - Aug 2021

Initially a 3 month contract that was extended a further 6 months working for Versantus.

I was helping to build a system to manage charging electric cars, which at it's core was a Drupal 8 site. Complex system architecture with multiple APIs.

Was responsible for peer reviewing code, writing tests (Behat and Unit), production deployments and helping to improve the CI pipeline.

SOLVERBOARD

Web Developer
Sep 2020 - Nov 2020

Three month contract for Solverboard building various Drupal 9 sites for JA Job Spark, an Indiana job Fair and also a few small sites for the pharmaceutical company Lilly.

HELASTEL

Senior Software Engineer
Jul 2018 - Oct 2020

This role involved managing the technical delivery of large projects, providing estimates, specification documents and technical documentation.

I was mainly working with Laravel but also some Wordpress and single page apps.

MONKII

Web Developer
Jul 2014 - Apr 2018

I was involved in all aspects of projects including scoping, quoting, client meetings, development, testing and maintenance. I was solely responsible for delivering several large Drupal 7 and 8 sites including several e-commerce sites.

MOTO HOSPITALITY

Sep 2013 - Apr 2014

Worked as the sole developer to rebuild the company's intranet and several other internal company systems using Drupal 7.

THINK BDA

Mar 2011 - Sep 2013

Whilst at Think BDA I focused on Drupal development (6 & 7) but also worked on Wordpress and Code Igniter projects. Used Git for version control.

BEAM DIGITAL

Nov 2009 - Sep 2010

Helped to develop a site using a custom framework. Developing PHP, MySQL, HTML and JS skills. Also utilised Cake PHP and Subversion.
